EUROSON 2018 in POZNAN (The 30th Euroson Congress of the EFSUMB)

Dear Members of EFSUMB, Friends and Colleagues,

We have a great pleasure to invite you to the 30th Euroson Congress of the EFSUMB, which will take place in

Poznan 6-9 September 2018. The Congress will be held in the Congress Centre of the Poznan International Fair simultaneously with the XIV Congress of Polish Scientific Society of Ultrasonography.

The substantive part of the Congress EUROSON 2018 will include the presentation of all the applications of ultrasound in modern diagnostic imaging - on the lectures, plenary sessions and ultrasound training workshops. During the ultrasound apparatus and equipment exhibition, new technologies and programs in sonography will be presented, a rich social part of EUROSON Congress 2018 will enable recreation, socialising and experiencing Polish hospitality.

Please make a note of the dates below and visit the website frequently. Don't forget to register as soon possible to get promotional prices!

Title: **Elastography of Superficial Structures: Where are we now?**

- To appreciate the widespread use of elastography of superficial structures
- To understand the strengths and weaknesses of current applications
- To be able to appreciate the potential in many fields
- To be able to incorporate elastography into your own clinical practice

Moderators: Paul Sidhu & Michel Claudon

All lectures 20' with 10 min discussion time

1. **Thyroid US elastography: indications and limitations** Vito Cantisani

- To learn about updated status on thyroid nodule evaluation by using TIRADS and US-elastography
- To provide tips and tricks, Guidelines established indications and limitation of thyroid US-elastography

2. **Elastography of the breast: When should we assess tumour stiffness?** Jonathan Carlsen

- To learn how to perform elastography of the breast with different US techniques.
- To learn when breast elastography is a useful adjunct to the standard breast ultrasound examination
- To understand the potentials and limitations of breast elastography

3. **Is there any value in tendon and nerve assessment?** Andrea Klauser

- To learn about the value of sonoelastography in musculoskeletal disorders
- To understand the impact of sonoelastography in tendon and nerves
- To appreciate the meaning of sonoelastographic findings in tendon and nerve disorders
- To become familiar with sonoelastographic techniques used in tendons and nerves

4. **Scrotal elastography: Hype or Real?** Michele Bertolotto

- To learn about how to perform elastography of the testis with the different US equipment
- To become familiar with the appearance of normal testis at strain and at shear wave elastography
- To understand the potential and limitation of elastographic modes in imaging scrotal pathologies
